**(a) The normalized half-triangle**

Position $k$ in row $n$ contains $\binom{n}{k}$.

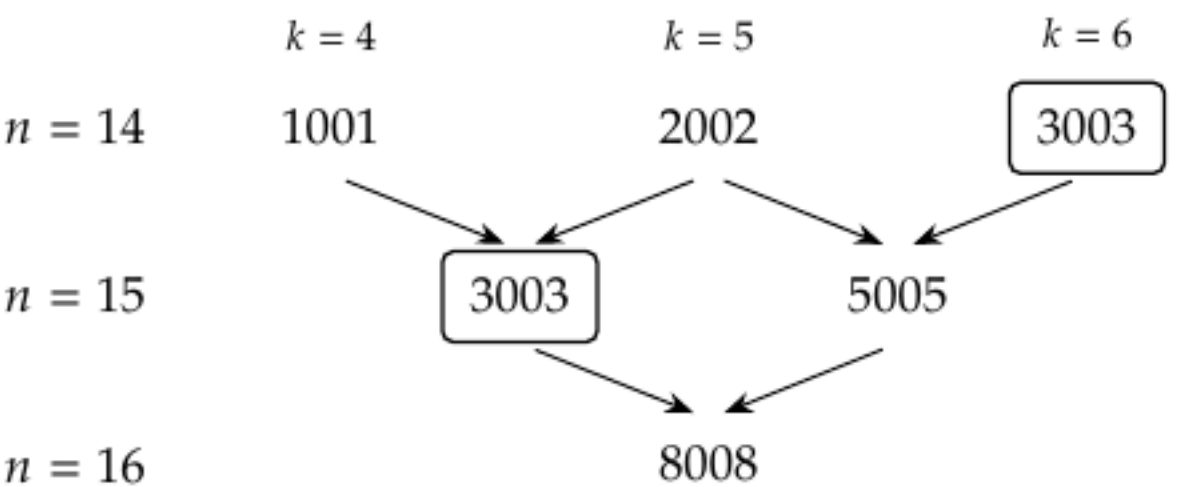

Boundary: $k = 0, n$, all ones

Omit the diagonal $k = 1$

Retain $2 \le k \le n/2$

Reflection pairs equal entries. Keep a central entry only once.

**(b) The neighboring occurrences of** 3003

$1001 + 2002 = 3003$

The two framed entries lie at $(14, 6)$ and $(15, 5)$. Each arrow joins an entry to an entry in the next row to which it contributes.
